

**\*Postdoctoral position at University of Colorado, Electrical, Computer and Energy Engineering, Professor Juliet Gopinath.\***

The start date is January 2012, for one year. Potential research projects will include reconfigurable devices based on optofluidics, beam combining, mid-infrared lasers and broadband sources, and spectroscopy. Projects will include a combination of experiments and theory. There will be opportunities to write grant proposals and mentor students. The successful candidate will have a strong background in optics and lasers through experimental research and academic courses. There is also potential to extend the position beyond the initial year term.

University of Colorado at Boulder is host to a very active research environment in optics. Postdocs are considered research faculty and receive generous benefits. For more information, please contact Prof. Juliet Gopinath via email: [julietg@colorado.edu](mailto:julietg@colorado.edu) or visit her web-page: <http://ecee.colorado.edu/~julietg/>
